

PRITISH KUMAR PATRA

Data Analyst | SQL • Python • Power BI • Tableau • Excel • Data Visualization

Bhubaneswar, India • +91 8908320525 • pritishpatra21@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with hands-on training in SQL, Python, Power BI, Tableau, and Advanced Excel, transitioning from 7 years of experience as a Software (Frontend) Developer. Skilled in data cleaning, data modeling, dashboard design, and translating business requirements into data-driven solutions. Brings strong problem-solving, debugging, and analytical thinking developed through building and testing production applications, working with data from REST APIs, and collaborating with cross-functional and business stakeholders in Agile environments. Combines technical depth in SQL (joins, CTEs, window functions, stored procedures) and BI tools (DAX, Power Query, data visualization) with a proven track record of reliable delivery, code quality, and client communication.

TECHNICAL SKILLS

SQL: Joins, CTEs, Window Functions, Stored Procedures, Query Optimization

Python: Pandas, NumPy, Matplotlib

BI Tools: Power BI (DAX, Power Query, Data Modeling), Tableau

Excel: Advanced Excel, Pivot Tables, Power Query, XLOOKUP

Databases: SQL Server, PostgreSQL, MongoDB

Visualization: Power BI Dashboards, Tableau, Excel Charts, Matplotlib

Statistics & Data Prep: Statistical Analysis, Data Cleaning, Data Validation, ETL Concepts

Developer Tools: Visual Studio, Visual Studio Code, Postman

Version Control & DevOps: Git, GitHub, Azure DevOps, Agile/Scrum

DATA ANALYTICS PROJECTS

Blinkit Sales & Delivery Dashboard | *SQL, Power BI*

Business Problem: Operations and category teams needed a consolidated view of order volumes, revenue, and delivery performance to spot trends across regions and product categories.

Approach: Wrote SQL queries to extract, clean, and aggregate order and delivery data; built an interactive Power BI dashboard with DAX measures, filters, and drill-downs.

Key Insights: Surfaced patterns in order volume and delivery performance by category and region that would support faster operational decisions.

Impact / Skills Demonstrated: Applied SQL data preparation, Power BI data modeling, and dashboard design end-to-end — from raw data to a decision-ready report.

Netflix Content & Viewership Dashboard | *SQL, Power BI*

Business Problem: Content teams need visibility into how a catalog breaks down by genre, release timing, and ratings to guide content strategy.

Approach: Used SQL to query and structure the content dataset, then built a Power BI dashboard with DAX measures and interactive visuals.

Key Insights: Highlighted genre distribution, release-pattern trends, and ratings breakdowns across the catalog.

Impact / Skills Demonstrated: Demonstrated ability to turn a raw dataset into an interactive, stakeholder-ready BI report using SQL + Power BI together.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer — Accenture, Bengaluru

06/2024 – Present

Internal Project

- Collaborated closely with backend developers to integrate Azure Function Apps as backend data services, ensuring accurate, seamless data flow between systems.
- Performed cross-browser testing and debugging to validate data display and application behavior, reducing inconsistencies across environments.
- Built and optimized reusable UI components and modules, improving maintainability and supporting scalable, data-driven features.

- Participated in Agile ceremonies (sprint planning, stand-ups, code reviews) to align technical delivery with business and stakeholder requirements.
- Used Git for version control, maintaining clean, well-documented repositories to support collaborative development.

Senior Frontend Developer — Accenture, Bengaluru

03/2023 – 05/2024

Innovation Hub Project

- Partnered with backend teams to integrate RESTful APIs into the application, enabling real-time data updates and improving data accuracy for end users.
- Worked with Node.js-based backend services to streamline data processing, improving application performance and scalability.
- Converted business requirements from product managers and stakeholders into technical solutions, aligning delivery with business goals.
- Followed Agile methodology, contributing to sprint planning and code reviews to ensure timely, quality delivery.

Software Engineer — Infosys, Bhubaneswar

07/2021 – 02/2023

Network & Provider Project

- Analyzed project requirements and aligned objectives with stakeholder needs, achieving a 100% success rate in meeting project goals.
- Conducted unit testing and output validation to improve software reliability and reduce defects.
- Reviewed code for quality and accuracy, providing feedback to maintain adherence to standards.
- Resolved application and data-related issues across production and non-production environments, supporting continuous operations.
- Communicated directly with clients to gather requirements and resolve issues, ensuring solutions met business expectations.

Software Engineer — Infosys, Bhubaneswar

05/2019 – 06/2021

Corporate Project

- Analyzed and interpreted business requirements to guide development priorities.
- Resolved coding and data-related issues efficiently, maintaining project timelines.
- Collaborated with senior developers and cross-functional teams in an Agile environment to ensure timely feature delivery.

CERTIFICATIONS

- Data Analytics Certification — Excel, Power BI, Tableau, SQL, and Python — Coding Ninjas, July 2026
- Microsoft Power BI – PL-300
- Microsoft Azure Fundamentals — AZ-900
- Microsoft Azure Administrator Associate — AZ-104
- Microsoft Azure DevOps Engineer Expert — AZ-400

EDUCATION

B.Tech, Mechanical Engineering

Kalinga Institute of Technology, Odisha, India — 2014 – 2018

LANGUAGES

English, Hindi, Odia, French
